- Single power supply

DESCRIPTION

The MAS4488 is configured as a full fan-in non-blocking switch matrix. Each input can be switched to a power combiner. This allows multiple inputs to be routed and combined to a single output. The obvious upside is its great switching flexibility.

Typical m x n Non-Blocking Matrix

The MAS4488 operates over a wide frequency band from 20 MHz to 3 GHz and is perfectly suitable for a wide variety of RF applications.

The system supports come with Ethernet control interface, allowing setup flexibility and easy remote test management.

APPLICATIONS

- Communication satellites & Teleports
- Mobile Marine Satcom
- Radar applications
- Test laboratories
- Development centers
- ATE stations
